

Business Consulting

We are focused on an uncompromising pursuit in understanding your business drivers in:

- Finance
- Accounting
- Finance and Accounting Operations,

and delivering solutions specifically designed to enhance your critical capabilities.

With increasing shorter business cycles, we work along your side to re-engineer your process to focus on your Sustainable Competitive Advantage (SCA).

First we ensure that your basic regulatory infrastructure is meeting your requirements.

Then we work with you to release your staff talent by migrating recurring transactional processes to internal or external infrastructure.

Last but not least we discern your critical operational capabilities and means of their sustaining. All the above with the objective to support your company growth dictated by its vision.

Areas of Proven Expertise

Finance and Accounting Process

- Business Process Improvement (BPI) and organizational change. Organizational partnerships and collaborations.
- Re-engineering of your processes to capture full potential of your staff talent.
- Planning and implementation of flexible business architecture, including transactional and system improvement.
- Migration of back office capabilities to cloud or outsourcing.

Controls and Management Systems

- Implementation and audit of regulatory compliance controls, SOX and COBIT.
- Financial audits
- Implementation and audit of Business Management Systems, ISO 9k, 9kTL and 14k
- Business Intelligence and Balance Scorecards

Mergers & Acquisitions

- Detailed due diligence
- Tax Compliance and Accounting Services
- Early focus on Go to Market (GTM) for fast and joint revenue returns.
- Worldwide acquisition integrations
- Liquidation of emptied corporate shells

Borderless Expertise

With internet and knowledge based economy business of any scale equal chance to compete and exploit international advantages. It requires new and higher levels of collaborations within boundaries of your enterprise, but also beyond, with your partners and suppliers. As a result your competitive advantage may shift toward those relationships.

..to exploit that opportunity

- Reposition Finance and Finance Ops to support internal and external collaboration and partnerships.
- Trust, but verify, by establishing controls, by defining processes, planning, benchmarking and reporting.
